A UNIVERSE AT YOUR FRONT DOOR

Blast off with the Kalamazoo Nature Center this summer to explore the unknown right here on planet Earth! Space may be the final frontier, but sometimes we forget what makes our planet the perfect space station to base our investigation of the stars. Learn about our planet’s place in the galaxy, and how it is home to some truly extraordinary plants, fungi, and animals — even meet a few of their animal ambassadors! Some animals in Michigan are so spectacular, they seem almost alien.

PROGRAM FEES: $275 per library, school or community group less than 250 people. Travel fees apply for locations more than 65 miles round trip from KNC. Discounts for multiple programs and locations are available.
